

Elements and Principles of Design Activity

Find at least ten examples of our Elements/Principles of Design vocabulary from magazines or create your own designs using the magazines as your "fabric". You may even choose to sketch your own designs with colored pencils if you prefer. (See Design Process Vocabulary.) Be sure to label each design or picture as to which vocabulary word(s) it represents. Write a complete sentence for each example noting why you thought it represented that vocabulary word (or words). You may use the croquis below as a template for making your designs. You will either turn this in by the end of class or finish at home and bring in by next class if you prefer to work on your samples today.

Please note: you will be having a quiz on all 1.02 words on October 9th(A-Day)/12th(B-Day)
