### Zig zag Seam Finish

A machine zigzag finish is a quick and easy way to prevent raveling. The zigzag seam finish is best for medium and heavy weight fabrics.

- 1- Sew one 5/8" seam down one of the 8" sides of fabric.
- 2- Press the seam open.
- 3- Set the machine on a zigzag stitch. (Set the width high-5, and length low-1.5).
- 4- Stitch close to the edge of the seam allowance through a single layer of fabric (sew through each of the seam allowances separately and not through the outside of the seam).
- 5- Staple your sample to this direction sheet.
